TECH RESUME OF

PRETOM AREEFIN PRANTO

Computer Science Undergraduate • ML & AI Enthusiast
• Programmer • Martial Artist • Hip-Hop Artist

+8801950822136

pretomareefin@gmail.com

Dhaka, Bangladesh

Github Link

Linkedin Profile

Driven and versatile Computer Science undergraduate with hands-on experience in AI data training, machine learning, and content creation. Adept in freelancing, content writing in numerous niches and social media management

EDUCATION

2022 - 2026
Brac University
Bachelor in Computer Science

2020 - 2022
Dhaka City College

2013-2019
Willes Little Flower School & College

SKILLS

- **Programming & Tools**: Python, JS, HTML, PHP, CSS, MERN Stack, MySQL, Machine Learning Frameworks, LaTeX, VS Code, Google Colab, AI Tools, MS Office Suites
- **AI & Data Work**: Prompt Engineering, Data Annotation, Machine Learning, Data Training
- **Creative Skills**: Content Writing, Rapping, News Creation, Social Media Management

EXPERIENCE

AI Data Trainer
Genmorphics AI, Bangladesh | 2024
- Specialized in localized prompt generation for AI tasks

Machine Learning Internship
Flyrank AI | 2026
- Started as an ML intern at Flyrank AI July 2026 Cohort
- Developing numerous ML based models

News Writer & Researcher
The Papyrus – Online News Media | 2024 – 2025
- Wrote analytical and topical articles
- Collaborated with editorial teams and optimized SEO practices.
- Created designs and news by Canva

Social Media Executive
G17 UAC Bangladesh | 2024 – 2026
- Managed digital campaigns aligned with UN SDGs
- Handled Social Media Platforms such as Facebook, Instagram, WhatsApp
- Represented BRAC University in nationwide activism and content strategy

Tech Writer & Researcher
Numerous Freelancing Platforms (Upwork, Fiverr) | 2024 – Present
- Wrote analytical and topical articles across academic and tech niches
- Created designs by Canva

PROJECTS (ACADEMIC/CONFERENCES)

Abar Nosto! :- A Community Issue Monitoring Platform

CSE471 - System Analysis And Design

- Developed a full-stack MERN community issue reporting platform with real-time activity feed, reputation system, and offline draft support
- Integrated secure data storage and user-friendly interfaces, and admin tools for managing platforms
- Deployment: **Abar Nosto**

BRACU Student Hub - A multipurpose student hub for Brac University Students

CSE470 - Software Engineering

- Developed a full-stack MERN student hub through which student resources, academic calender, deadlines of exams, faculty review and rating etc. can be accessed and worked on
- Integrated secure data storage and user-friendly interfaces, and admin tools for managing platforms
- Git Link: **BRACU Student Hub**

Mice Protein Expression Classifier

CSE422 - Machine Learning

- Built a Python-based Machine Learning model to classify and categorize a robust mice protein expression dataset
- Applied data analysis, feature engineering, and classification algorithms to derive biological insights
- Colab Link: **CSE422 MICE PROTEIN**

Neural Network Project : Music Generation Using Unsupervised Learning

CSE425 - Neural Network

- Constructed a signal conversion and playback system using ADC & DAC with Arduino logic
- Implemented real-time audio processing and hardware-software integration
- Git Link: **music_generation_using_unsupervised_learning**

LungCare: A Python ML-Based Clinical Decision Support Tool for Multiclass Lung Cancer Detection Using Histopathological Imaging

International Biotechnology Conference (2025)

- Developed a machine learning pipeline for accurate classification of lung cancer subtypes
- Implemented data preprocessing, deep learning techniques, and visualization methods for medical decision support

AidTrack: A Multi-Purpose Health Care Platform for Doctor & Patient Management

CSE370 - Database Management Course

- Designed and built a healthcare platform enabling appointment scheduling, patient record management, and doctor-patient interaction using PHP, CSS, HTML
- Integrated secure data storage and user-friendly interfaces
